

Consultation – Transparency and Competition: Data and Land Control

13 August 2020

OVERVIEW

This call for evidence sets out proposals to increase transparency of contractual arrangements used to exercise control over the buying or selling of land.

The Government’s intention is to improve the ability of local communities to play an informed role in the development of their neighbourhoods and support its efforts to encourage more companies to enter the house building market.

It is also seeking views on the design of the policy and evidence on the impacts of the policy.
